

DEBORAH GORDON is a senior associate at the Carnegie Endowment for International Peace (Energy & Climate Program), where her policy research focuses on oil, climate change, energy, and transportation issues in North America and globally. Gordon managed an active energy and environment consulting practice beginning in 1996, where she served public, foundation, private, and non-profit clients. Gordon served as an instructor and co-director of the Yale School of Forestry and Environmental Studies' Transportation and Environment Program (1996-2000). She founded and directed the Transportation Policy Program at the Union of Concerned Scientists (1989-1996). Gordon began her career with Chevron. She holds a Bachelors of Science in Chemical Engineering and a Masters in Public Policy. Gordon has served on National Academy of Sciences committees and the Transportation Research Board Energy Committee. She lectures widely, delivers keynotes, and has been featured on radio, TV, and in print media. Her first book, *Steering a New Course* (Island Press, 1991) offered a comprehensive overview of U.S. transportation, energy, and environmental policy. Her recent book, *Two Billion Cars* (with Daniel Sperling) provides a fact-based case and roadmap for navigating the biggest global environmental challenge of this century—cars and oil (Oxford University Press, in paperback, 2010).
